Mr. Luis Pila Gonzales  
Restaurant Manager of "El Rincón del Sabor"

Quito January 21, 2021

Dear restaurant manager and staff.

This Letter of Intent is to express our interest in participating in the innovation and implementation of the food and product consumption and administration system in your restaurant "El Rincon del Sabor" since due to the health emergency it has become necessary to implement a system that ensure adaptation to a new normal, for which we present our draft work plan:

1. Design of a new logo that shows the dynamics of a menu where you can add your user, choose products and the time that you will be in the restaurant, while making it attractive and unmistakable for students.
2. Planning in the order in which the customer / user decides to consume, returning as a result the total price of the products, date and time they purchased them.
3. Storage of invoices within a file to facilitate their information and organization. Customer input through data such as name, ID and email.
4. Easy access to a database containing information on registered customers, available products and generated invoices.

We consider that this system is the one that is required for your current and future business, which is ours, it will be possibly near the University of the Armed Forces ESPE, a situation to which this system would contribute satisfactorily since it is even capable of being improved, for which Having exposed the main reasons why this system is aligned with the requirements of the students and the covid-19 as a current problem, I remain attentive to your correct response and decision.

Thanking you in advance for your attention, I remain at your service.

Attentively:

**Cristian Maranje**  
Software Runners's Manager

**Luis Pila Gonzales**  
Restaurant Manager
